

Title: Diplomacy in the Digital Era: Security, AI, and Institutional Change

Date: September, 2025

How does digitalization transform diplomacy and what role might AI play in embassies? 🤖

During a recent visit to the German Embassy in Warsaw 🇵🇱 🇩🇪, organized by the [Union of Sisterhood Foundation](#), we were able to talk about the professional and personal sides of diplomatic work. The discussion was both informative and honest, covering everything from Polish-German collaboration and the role of women in politics to the daily life of a diplomat.

I was particularly interested in the German experiences with the digitalization of diplomacy and asked about the embassy's practices, including the use of disruptive technologies such as AI. The exchange was especially insightful, as the representative we met specializes in this field. While security and privacy remain the key challenges, Berlin is developing solutions aimed at advancing diplomatic practice while addressing these concerns.

A big thank you to the Foundation for the invitation and the chance to deepen my understanding of how technological innovation intersects with international relations.

(POL) 🇵🇱

Jak digitalizacja zmienia dyplomację i czy w ambasadach znajdzie się miejsce dla AI? 🤖

Podczas wizyty w Ambasadzie Niemiec w Warszawie, zorganizowanej przez [Union of Sisterhood Foundation](#), rozmawialiśmy o współpracy polsko-niemieckiej, roli kobiet w polityce oraz codzienności pracy dyplomaty.

Miałam też okazję zapytać o digitalizację dyplomacji i wykorzystanie nowych technologii, w tym AI. Bezpieczeństwo i prywatność pozostają głównymi wyzwaniami dla wdrażania sztucznej inteligencji 🛡️ 🤖

Dziękuję Fundacji za zaproszenie i możliwość poszerzenia wiedzy o tym, jak innowacje wpływają na stosunki międzynarodowe.
